

RESEARCH FELLOWSHIP PROGRAMME

INTERNATIONAL ANTI-CORRUPTION ACADEMY

About the Programme

IACA offers research fellowship positions for a selected number of highly qualified and motivated young researchers on a competitive basis. The programme provides research fellows with the opportunity to conduct innovative research at a unique global institution in the areas of anti-corruption, compliance, and/or collective action. The duration of the fellowship is three months, and successful candidates will receive limited financial support, which will cover a reasonable portion of their travel, accommodation, and daily expenses. At the end of the programme, fellows shall complete a publishable article.
